SUMMARY

Software engineer with 3+ years of experience shipping full-stack web products, LLM-powered applications, and workflow automations. Hands-on with RAG pipelines, AI agents, and the OpenAI, Anthropic, and Gemini APIs, plus Next.js, FastAPI, and PostgreSQL. Built a product used by 8,000+ students. Experienced working remotely with clients across time zones, from first call to production, with clear async communication and a bias for shipping.

EXPERIENCE

Software Engineer, Cloudpacer Jun 2026 - Present | Lahore, Pakistan

- Build AI automation and generative AI applications, including RAG pipelines and LLM-integrated workflows.
